This Office Action is in response to the communication filed May 22, 2006.

Upon reconsideration, the indicated allowability of claim 6 is withdrawn in favor of the following. The delay in making the rejection is regretted.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor.

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to used Woodruff keys instead of pins because applicant has not disclosed that either type of fastener provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected applicant's invention to perform equally well with pins or Woodruff keys because applicant states that pins are considered an equivalent of Woodruff keys and be used without departing from the scope of the invention. Therefore, it would have been an obvious matter of design choice to modify Taylor to obtain the invention as specified in claim 6.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it includes several periods and is thus not in a one sentence format. Correction is required.
